

Air-1 Radio is an important part of my community because of the wholesome music. It is family friendly and uplifting. I am very concerned that changing to a LPFM station may effect our signal and I would no longer have Air 1 in my hometown. I fully support Air 1 and would be very upset if it were no longer available. This station is vital to our community to help reach people who are desparate to hear the message of Airl. This radio station has helped save people from suicide and other life-threatening habits as well as bring a message of hope to many. It is vital to the public, to the community, to my family that Air 1 remain on the air with a powerful signal in all areas. You would be making a huge mistake to change the signal so that not everyone would be able to receive it in their homes, at work, in their car, etc. Please don't change the station's current status. Thank you for your time!
